📋 Objective

Software Engineer with over 3 years of experience in developing and maintaining web applications using Angular, JavaScript, TypeScript, SQL, and Node.js. Skilled in building responsive user interfaces, integrating RESTful APIs, and working with relational and NoSQL databases. Experienced in delivering scalable and reliable applications in Agile environments, with strong problem-solving skills and a solid foundation in software design principles. Currently pursuing an MSc in Data Science, adding analytical and data-driven thinking to software development.

🎓 Education

Master Of Science

Data Science . University of East London.

2025 – 2026 | London, UK

Bachelor of Engineering

Mechanical Engineering. Anna University .Secured - 80.00%

2016 – 2020 | Chennai, India

📁 Experience Summary

- Having over 3+ years of experience in developing web applications for both UI and API using HTML, CSS, JavaScript, TypeScript, Angular (14, 17, 18), Node.js, and SQL.
- Good understanding of Node.js, Object-Oriented Programming (OOP), Java 8, J2EE, and Servlets.Hands-on experience with Angular CLI (Command Line Interface) for efficient application development and build processes.
- Proficient in using tools such as Git, Jira, Sourcetree, and Bitbucket for version control and project management. Experienced with IDEs including Visual Studio Code and Notepad++.
- Basic knowledge and hands-on experience with Figma for UI/UX design and prototyping.
- Strong experience working with relational databases such as MySQL and SQL, and NoSQL databases like MongoDB.

🧠 Key Skills

Programming & Web Technologies:

Angular (14–18), JavaScript, TypeScript, HTML5, CSS3, Node.js, Python, Java (basic), Spring Boot (basic).

Backend & APIs:

RESTful API development and integration, JSON, Authentication & Authorization (basic)

Databases:

SQL, MySQL, MongoDB, SQLite

Version Control & Dev Tools:

Git, Bitbucket, Jira, Sourcetree, Postman, Visual Studio Code, IntelliJ IDEA, Eclipse

UI/UX & Design Tools:

Figma, Angular Material, Bootstrap

Operating Systems:

Windows, macOS

Work Experience

Software Engineer
Cognitivemobile Technology Pvt Ltd

02/2024 – 12/2024 | Chennai, India

Software Engineer
TVM Infotech Pvt Ltd

09/2021 – 01/2024 | Chennai, India

Projects

1. Cybot

A web-based chat application integrated into websites and mobile apps, enabling visitors to communicate in real time with customer service agents or AI chatbots. The chat widget appears on the interface and proactively invites users to start a conversation, providing instant support and interaction.

Responsibilities:

- Designed and developed responsive web pages and chat widget components.
- Implemented real-time chat functionality using RESTful APIs and WebSocket communication.
- Worked closely with clients to gather requirements and finalize project scope.
- Performed bug fixing and troubleshooting to ensure smooth user experience.
- Ensured cross-browser compatibility and mobile responsiveness.

Environment: Angular 17, TypeScript, JavaScript, Angular Material, HTML5, CSS3, Node.js, MongoDB, Kafka, Figma

2. NFM – Sales Completion

A sales completion application used by sales representatives to explore products, generate resources, assemble orders, and complete transactions directly on the sales floor. The application was developed to run on both Windows and macOS platforms using Angular.

Responsibilities:

- Developed user interfaces using HTML5, CSS3, TypeScript, Angular 14, and Angular Material.
- Designed and implemented web pages according to business requirements.
- Interacted with clients to understand project needs and finalize scope.
- Fixed bugs and improved application stability.
- Collaborated with the QA team to define test cases and resolve defects.

Environment: Angular 14, TypeScript, JavaScript, Angular Material, HTML5, CSS3, Azure DevOps

3. TaskMan

An internal task management system that allows employees to log check-in and check-out times and track daily tasks. The system manages employee, client, and site information and provides a ticketing feature for reporting issues. Key modules include Dashboard, Employees, Clients, Sites, Tickets, Jobs, and Locations.

Responsibilities:

- Developed user interfaces using HTML5, CSS3, JavaScript, Angular 14, and Angular Material.
- Worked on enhancements and change requests based on user feedback.
- Analysed functional and technical requirements for new features.

Environment: HTML5, CSS3, JavaScript, Bootstrap, Angular 14, Angular Material, GitHub
